CubeSat Development in Student Societies

BLUEsat UNSW

Presented by Timothy Guo

Learn

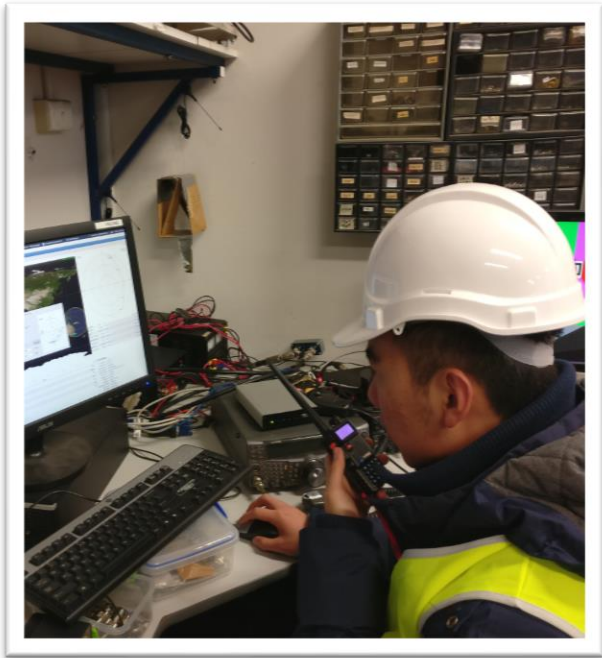

Grow

Connect

How to move from students...

...to leaders

LEARN - PROJECTS

Groundstation

Support and improve communication with satellites including ACSER's ECO

Off-World Robotics

Develop a rover for competitions with applications in off-world exploration

Balloon

Deliver a platform to carry BALSAR to high altitudes with stability control

CubeSat

Develop a nanosatellite to carry experimental biological payload

GROWTH

- Experience
- Leadership

BLUEsat is able to overcome challenges and grow through the support of ACSER and UNSW

CONNECT

Partnerships and networking build opportunities for collaboration and fuel the industry

Events and activities generates publicity and interest
